EXECUTIVE MASTER IN LAW & AI

LIFELONG LEARNING PROGRAMME 2023-2024
New educational programme on the law and policy questions raised by artificial intelligence (AI) and robotic technologies. The programme is entirely taught in English and divided into four blocks of 24 modules. Students who pass all the modules will be awarded an “Executive Master” of 15 credits.

### Block 1: AI Fundamentals

<table>
<thead>
<tr>
<th>Module</th>
<th>Date</th>
<th>Authors</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Ethics and AI</td>
<td>24.11.2023</td>
<td>N. SMUHA, L. NAUDTS</td>

</tr>
</tbody>
</table>
At the start of the new academic year (2023-2024), we can draw the following lessons from previous years:

- It is fair to say that we were ahead of our time when we launched our first course on law and artificial intelligence back in 2017, long before the buzz around AI. Today, everyone is talking about this issue, which has the potential to radically transform our society.

- With the emergence of AI chatbots and AI-generated inventions, for example, there can be no doubt that our course programme will go on developing at lightning speed. Furthermore, Europe is determined to play a leading role in the regulation of AI, which is why we have added no fewer than six new modules to our Executive Master programme (see the new programme opposite).

- While distance learning works perfectly well and indeed allows students from around the world to follow our courses, nothing can replace in-person contact with lecturers/teaching staff and fellow participants. Therefore, our advice to all those who can manage it is to come to Brussels for classroom learning – it will be worth your while!

www.bsc-brussels.eu

PHILIPPE LAMBRECHT
President of the BSC
Special Advisor VBO FEB

CHARLES GHEUR
CEO of the BSC
Advisor for Minister-President of the Federation Wallonia-Brussels

NICOLAS PETIT
Joint Chair in European Union Competition Law
European University Institute
The ‘digitalization’ of our lives poses a real challenge for the law, given that the rules currently in force may turn out to be unsuitable or insufficient to cope with this new reality.

This could have an impact on all aspects of the law, including liability law (civil/criminal, contractual/non-contractual), intellectual property, trade secrets, competition, consumer protection, privacy protection, insurance law and judicial law. Sooner or later, the changes brought about by AI will affect every single area.

The aim of this programme is to help legal advisers and public policymakers better understand these changes, anticipate them and guide them where appropriate.

**MULTIDISCIPLINARY TRAINING (BOTH LEGAL AND TECHNICAL)**

To grasp AI’s impact on our society, it is worth learning about the technical aspects as well: understanding how an algorithm works, getting to grips with IT jargon, understanding what is meant by ‘deep learning’, ‘neural network’, and so on. This is also about teaching legal advisers about technology. Legal advisers and policymakers need to have a working understanding of technological concepts in order to provide better counsel to their clients, companies or public authorities.

With this in mind, the courses are run by both legal advisers and technical experts. The technical experts use concrete, understandable language to shed light on changes in our society and the huge potential of AI and cognitive technologies.

Special emphasis is placed on sectors where AI is growing the most at the moment: mobility, finance, healthcare and legal services.
ADMISSION REQUIREMENTS

EDUCATION
All applicants must hold a first cycle of higher education diploma in Law, Economics or Management Science. Alternatively, applicants may have completed two years of higher education with 3 years of relevant professional experience in a field related to law and digital technology.

LANGUAGE SKILLS
A working knowledge of English is required (Council of Europe, Independent User, scale B2).

VISA REQUIREMENTS
Participants must hold a valid visa when they attend the programme at the Brussels School of Competition. Non-EU foreign students may have to provide a copy of their visa during the application process. Relevant information may be found on the website of the Ministry for Foreign Affairs:

No visa is required for distance learning classes.

FEES
The tuition fee is €3,600* for the entire course (24 modules).

The fee for 12 modules is 2,400€. The fee for a separate module is €250.

Students interested in spreading their attendance over 2 years should mention it at the beginning of the application process. The Board may then allow the programme to be spread over a maximum of two years. Students who want to spread the programme over two years will be requested to pay a €250 fee per additional year. This fee covers administrative costs.

The course fees are due before registration deadlines.

REGISTRATION
Executive Master applicants must submit their application no later than November 10, 2023. The registration form can be filled directly from the Brussels School of Competition website:

bsc-brussels.eu/artificial-intelligence/how-to-apply/

As a rule, tuition fees must be paid in full prior to the start of the programme or chosen block/module. Upon receipt of payment, the student’s BSC account will be activated and registration will be complete.

The programme is geared towards the requirements of working professionals. Participants may decide to follow only part of the programme, opting for a limited range of modules which correspond to their main areas of interest. Students attending the programme, or part of it, are entitled to continuing professional development (CPD) points from the relevant authorities.

* fees include the programme modules, catering and course materials only.
ORGANISATION

TIMETABLE

The Executive Master in Law & AI covers a full academic year, starting in 25 November 2023 and ending on 16 June 2024. The courses are organised on Friday mornings via Zoom or at the premises of the BluePoint Brussels. The Executive Master is divided into four blocks of 24 modules. Each module takes place on Friday mornings from 9.30 a.m. to 12.30 p.m. (Brussels Time).

DISTANCE LEARNING CLASSES

All classes can be taken remotely:

› Either the classes are given completely remotely via the “My BSC” platform

› Or they are given in a hybrid format, i.e. in person to students while being simultaneously livestreamed.

ASSESSMENT

To earn the Executive Master in Law and AI diploma, students must:

1. EVALUATION OF BLOCKS 1 AND 2

At the end of block 1 and block 2, students will receive via the “My BSC” learning platform an individual take-home exam to be returned two weeks later (e.g. case studies, multiple choice questions, etc.).

2. END-OF-YEAR WORK

During the year, the student will identify a subject of his/her choice related to AI law. The final project can take one of the following two forms.

› If the subject is more theoretical, the student can write a dissertation (about 20 pages).

or

› If the subject is more technical and/or practical, the student can choose to give an oral presentation in front of a jury (e.g. business case, AI application to be developed by your organisation, Legal Tech project, etc.)

3. EXECUTIVE MASTER IN LAW AND AI DIPLOMA

Participants who complete the full programme and pass the assessment examination will receive an Executive Master in Law & AI, as well as 15 credits (see European recognition and the decree of 7 November 2013 defining the higher education landscape and the academic organisation of studies). The certificate is personally significant for the participant's training and education plan, and the credits can be used when pursuing academic training in Europe.

4. ATTENDANCE POLICY

In order to maintain a dynamic and effective learning environment, it is essential students attend all scheduled classes, both held in person or online. Although attendance is not mandatory for all classes, students are allowed up to three absences over the course of the programme.

Absences must be justified, whether due to work activities or medical reasons. Attendance is highly recommended.

TEACHING MATERIALS

Students will receive an online documentation pack comprising an outline of their course and relevant regulations, case law and academic literature for each module. Students may be given reading assignments. Students will have access to an online teaching platform where they can upload the exam and consult the materials before and during each course. All the courses will be filmed (video recording available for each session) and uploaded on the student platform.
1. **ETHICS AND AI**

24.11.2023

- **NATHALIE SMUHA**
  Lawyer & Researcher
  KULeuven

- **LAURENS NAUDTS**
  Affiliated Senior Researcher
  KULeuven

AI CONTRACTING

22.03.2024

TIM VAN CANNEYT
Partner, technology
Fieldfisher

LOUIS VANDERDONCKT
Associate, technology
Fieldfisher

CONTENT

This course focuses on the intersection of AI and IT contracting, and provides students with a thorough understanding of the contractual considerations that are at play when developing, procuring, implementing and/or deploying AI systems. The course equips participants with the knowledge and skills required to navigate the legal and practical considerations associated with contracting for AI projects.

- The nature of AI technology development (characteristics and design methodology of AI technology versus conventional software development)
- The complexity of the AI supply chain and foundation models from a contractual point of view
- Unfair terms and ‘take-it-or-leave-it’ terms
- Model contractual terms
- Practical focus on key contract clauses for AI systems: IP, liability, data protection, governance, etc.
15  AI APPLICATIONS FOR LAWYERS

29.03.2024

PROFESSORS

ERIK DE HERDT
Manager Legal & Regulatory Affairs
Eurofiber Belgium

THOMAS AERTGEERTS
Co-Founder and Legal Engineer
Aeco Legal Tech

CONTENT

- AI, big data & open data: challenges and opportunities
- Drivers for increasing success AI
- Expert Systems & AI applications in LegalTech
- Machine Learning & Natural Language Processing
- Ethics of Algorithms
- Open legal data
- Open case law
- Legaltech in practice
- Digital transformation
- Tailor-made solutions for your company
- Customized Business Applications
- Document Analysis and review
- Retrieving online information
- Legal Inference Transformation Engine

16  CODING FOR LAWYERS

05.04.2024

PROFESSORS

TOON CALDERS
Professor of Computer Science
Universiteit Antwerpen

CONTENT

During the lecture you will learn the basic principles of coding:
- Sequence of instructions
- Loops and repetitions
- Conditional execution
- Variables

You will learn these constructions while step by step implementing an algorithm to escape from any maze.

- Exercises on writing small programs.
- Functions as a tool for abstraction
- Manually build a classification system

The lecture will be wrapped up by connecting the new insights you gained into programming and with AI applications such as text classification.

LIVE STREAM CLASSES

CLASSES MARKED WITH A ZOOM LOGO WILL BE EXCLUSIVELY GIVEN ONLINE. ALL OTHER CLASSES CAN BE TAKEN BOTH IN PERSON AND REMOTELY.

Dates and format are subjected to change due to unforeseen events. Any changes will be communicated to students by email.
17 BEYOND AI: BLOCKCHAIN AND DIGITAL CURRENCIES

PART 1
- Blockchain History
- What's a Blockchain?
- Where does it come from?
- How does a Blockchain work?
- Blockchain transaction
- Blockchain Principles
- Blockchain Concepts
- Paying with cryptocurrencies
- Using Bitcoin
- Hard wallet
- Blockchain projects

PART 2
- Exploring some blockchain concepts
  - Crypto-assets: NFTs
  - Smart Contracts
- Blockchain and law
  - NFTs and legal implications
  - Liability
  - Blockchain and Data Protection
- Blockchain regulation
**VERTICAL BLOCK 4 APPROACH**

**19. ECONOMIC REGULATION AND COMPETITION POLICY IN THE METAVERSE**

- **Date:** 26.04.2024

**PROFESSORS**

- **NICOLAS PETIT**
  Professor of Competition Law
  European University Institute

- **THIBAULT SCHREPEL**
  Associate Professor of Law VU Amsterdam & Faculty Affiliate Stanford

- **CYRIL FISCHER**
  Digital Law and Data Protection Lawyer Stibbe

**CONTENT**

- Description of the 'Metaverse': Essential Components, Modalities
- History
- Key technologies and concepts
- Interoperability issues in the Metaverse
- Web3 and its competitive dynamics
- Enforcement new regulation around Healthcare, Online identity...
- Technical Stakes: Cybersecurity, Access, Metaverse Competition Agency
- Ethical and Societal Stakes: Online Harassment, Fake News, Eco-Transition, Radicalization

**20. MOBILITY AND AI**

- **Date:** 17.05.2024

**PROFESSORS**

- **FLORIAN JACQUES**
  Researcher in ICT Law at UNamur

- **NADINE ZURKINDEN**
  Researcher University of Zurich

**CONTENT**

- Introduction to Smart Mobility
- Artificial Intelligence in the automotive sector
- Analysing the impact of algorithms in the automotive industry and on insurance company
- EU Regulatory approach to AI: Critical issues for our industry
  - Commission’s White Paper on AI
  - European Parliament Draft Reports on AI related aspects
- Conclusion

**LIVE STREAM CLASSES**

Classes marked with a **zoom logo** will be exclusively given online. All other classes can be taken both in person and remotely.

21 HEALTHCARE AND LIFE SCIENCES

24.05.2024

粗体

内容

- AI in Healthcare: principles, applications (augmented medicine), challenges and future directions
- Identifying health issues through the analysis of digital data
- Analysing medical images
- Analysing genomics in the context of the advent of personalized medicine
- Ethics in data
- AI use cases in healthcare

22 FINANCE AND AI

粗体

内容

- General introduction: AI as a Technology
- Machine Learning Landscape
- What has changed?
- Three types of Machine Learning
- General Legal & Ethical principles & considerations
- Trustworthy AI
- AI Adoption in Finance: Where are we today?
- Use Cases:
  - AI Powered Predictive Analytics
  - Hyper-personalization
  - Intelligent Process Optimizations (Back-Office)
  - How and where should FSI’s start? Tips, Tricks and advice on how to start with AI
This comprehensive course is designed to provide you with a solid understanding of the crucial role that standardisation plays in the AI landscape.

During this course we will address these topics:

- General introduction to Standardisation
  - Origins
  - Standards development organisations
  - Processes
  - Participation modes
- Standardisation of AI
  - International
  - European
- Standardisation policy & strategy
  - The new legislative framework
  - EU standardisation strategy
- The link between the AI Act and Standardisation
  - Standardisation request
- Interactive exercises

WHAT THEY SAY ABOUT US?

"The diversity of the teaching profiles is a real asset of this program (lawyers, engineers, academicians, people from the industry...). Passionate and exciting professors with a technical and legal view on a subject that is still in its infancy. In addition, the BSC offers a program adapted to those who work with an exam formula that encourages deepening of the subject and critical thinking. I have enjoyed taking this program and I highly recommend it!"

LAURENCE VAN MEERHAEGHE
Febelfin

"This program addresses all essential legal and ethical aspects of AI but goes even beyond these aspects and provides a great range of diverse perspectives from the mere technical to the high level political and economical developments of AI. Professors are impressive experts and passionate about their subject, especially as this legal area is still "in the make", creating many controversies and challenging opinions depending on your perspective. The program encourages you to think in an innovative, diverse and critical manner to how our future should look like and how to develop the right and appropriate legal and ethical framework to make sure AI remains an extraordinary asset for our future while managing all potential risks! I would definitely recommend this program to all lawyers eager to remain up to date in terms of what our future world might look like."

LAURENCE EINSWEILER
Pfizer

"The program allows participants to get a real 360 view on all legal and ethical questions artificial intelligence raises. The faculty is very diverse with experts from different fields shedding light on the current and upcoming changes in AI and AI regulation. I really enjoyed the variety of the content, the ability to delve in the technical aspects of AI (in addition to the legal aspects) and to get a good understanding of the newly developing regulatory framework of AI."

ANNELEEN STRAETEMANS
AB Inbev

GREAT SPEAKERS WITH RELEVANT EXPERIENCE IN DIFFERENT FIELDS OF LAW (IP, PRIVACY & DATA PROTECTION, ...) AND VARIOUS DOMAINS RELEVANT TO AI (DATA SCIENCE, ENGINEERING, ...), COMBINED WITH INTERACTIVE COURSES MAKE THIS DIVERSE AND CHALLENGING PROGRAM ON AI OFFERED BY BSC A HIGHLY RECOMMENDED ONE!

JEAN-JACQUES DERÈZE
UZ LEUVEN

"Great speakers with relevant experience in different fields of law (IP, privacy & data protection, ...) and various domains relevant to AI (data science, engineering, ...), combined with interactive courses make this diverse and challenging program on AI offered by BSC a highly recommended one!"

JEAN-JACQUES DERÈZE
UZ LEUVEN
