SCHOOL OF
**ARTIFICIAL
INTELLIGENCE**

EXECUTIVE MASTER IN LAW & AI

LIFELONG LEARNING PROGRAMME 2024-2025

New educational programme on the law and policy questions raised by artificial intelligence (AI) and robotic technologies. The programme is entirely taught in English and divided into four blocks of 24 modules. Students who pass all the modules will be awarded an "Executive Master" of 15 credits.

FOREWORD

FULL ONLINE PROGRAMME AVAILABLE

At the start of the new academic year (2024-2025), we can draw the following lessons from previous years:

- › It is fair to say that we were ahead of our time when we launched our first course on law and artificial intelligence back in 2017, long before the buzz around AI. Today, everyone is talking about this issue, which has the potential to radically transform our society.
- › With the emergence of AI chatbots and AI-generated inventions, for example, there can be no doubt that our course programme will go on developing at lightning speed. Furthermore, Europe is determined to play a leading role in the regulation of AI, which is why we have added no fewer than six new modules to our Executive Master programme (see the new programme opposite).
- › While distance learning works perfectly well and indeed allows students from around the world to follow our courses, nothing can replace in-person contact with lecturers/teaching staff and fellow participants. Therefore, our advice to all those who can manage it is to come to Brussels for classroom learning – it will be worth your while!

www.bsc-brussels.eu

Advisor for Minister-President of the Federation Wallonia-Brussels

NICOLAS PETIT
Head of Department
European University Institute

AMBITION OF THE PROGRAMME

LEGAL, POLITICAL AND ETHICAL CHALLENGES

The 'digitalization' of our lives poses a real challenge for the law, given that the rules currently in force may turn out to be unsuitable or insufficient to cope with this new reality.

This could have an impact on all aspects of the law, including liability law (civil/criminal, contractual/non-contractual), intellectual property, trade secrets, competition, consumer protection, privacy protection, insurance law and judicial law. Sooner or later, the changes brought about by AI will affect every single area.

The aim of this programme is to help legal advisers and public policymakers better understand these changes, anticipate them and guide them where appropriate.

MULTIDISCIPLINARY TRAINING (BOTH LEGAL AND TECHNICAL)

To grasp AI's impact on our society, it is worth learning about the technical aspects as well: understanding how an algorithm works, getting to grips with IT jargon, understanding what is meant by 'deep learning', 'neural network', and so on. This is also about teaching legal advisers about technology. Legal advisers and policymakers need to have a working understanding of technological concepts in order to provide better counsel to their clients, companies or public authorities.

With this in mind, the courses are run by both legal advisers and technical experts. The technical experts use concrete, understandable language to shed light on changes in our society and the huge potential of AI and cognitive technologies.

Special emphasis is placed on sectors where AI is growing the most at the moment: mobility, finance, healthcare and legal services.

ADMISSION REQUIREMENTS

EDUCATION

All applicants must hold a first cycle of higher education diploma in Law, Economics or Management Science. Alternatively, applicants may have completed two years of higher education with 3 years of relevant professional experience in a field related to law and digital technology.

LANGUAGE SKILLS

A working knowledge of English is required (Council of Europe, Independent User, scale B2).

VISA REQUIREMENTS

Participants must hold a valid visa when they attend the programme at the Brussels School of Competition.

Non-EU foreign students may have to provide a copy of their visa during the application process. Relevant information may be found on the website of the Ministry for Foreign Affairs:

http://diplomatie.belgium.be/en/services/travel_to_belgium/studying_in_belgium

No visa is required for distance learning classes.

FEES

** fees include the programme modules, catering and course materials only.*

The tuition fee is **€3.600 *** for the entire course (24 modules).

The fee for 12 modules is 2.400€. The fee for a separate module is €250.

Students interested in spreading their attendance over 2 years should mention it at the beginning of the application process. The Board may then allow the programme to be spread over a **maximum of two years**. Students who want to spread the programme over **two years** will be requested to pay a **€250** fee per additional year. This fee covers administrative costs.

The course fees are due before registration deadlines.

REGISTRATION

Executive Master applicants must submit their application no later than **November 10, 2024**. The registration form can be filled directly from the Brussels School of Competition website:

bsc-brussels.eu/artificial-intelligence/how-to-apply/

As a rule, tuition fees must be paid in full prior to the start of the programme or chosen block/module. Upon receipt of payment, the student's BSC account will be activated and registration will be complete.

The programme is geared towards the requirements of working professionals. Participants may decide to follow only part of the programme, opting for a limited range of modules which correspond to their main areas of interest. **Students attending the programme, or part of it, are entitled to continuing professional development (CPD) points from the relevant authorities.**

ORGANISATION

TIMETABLE

The Executive Master in Law & AI covers a full academic year, starting in 25 November 2024 and ending on 16 June 2025. The courses are organised on Friday mornings via Zoom or at the premises of the BluePoint Brussels. The Executive Master is divided into **four blocks of 24 modules**. Each module takes place on Friday mornings from **9.30 a.m. to 12.30 p.m.** (Brussels Time).

DISTANCE LEARNING CLASSES

All classes can be taken remotely:

- › Either the classes are given completely remotely via the "My BSC" platform
- › Or they are given in a hybrid format, i.e. in person to students while being simultaneously livestreamed.

ASSESSMENT

To earn the Executive Master in Law and AI diploma, students must:

1 _ EVALUATION OF BLOCKS 1 AND 2

At the end of block 1 and block 2, students will receive via the "My BSC" learning platform an individual take-home exam to be returned two weeks later (e.g. case studies, multiple choice questions, etc.).

2 _ END-OF-YEAR WORK

During the year, the student will identify a subject of his/her choice related to AI law. The final project can take one of the following two forms.

- › If the subject is more theoretical, the student can write a **dissertation** (about 20 pages).

or

- › If the subject is more technical and/or practical, the student can choose to give an **oral presentation** in front of a jury (e.g. business case, AI application to be developed by your organisation, Legal Tech project, etc.)

3 _ EXECUTIVE MASTER IN LAW AND AI DIPLOMA

Participants who complete the full programme and pass the assessment examination will receive an Executive Master in Law & AI, as well as 15 credits (see European recognition and the decree of 7 November 2013 defining the higher education landscape and the academic organisation of studies). The certificate is personally significant for the participant's training and education plan, and the credits can be used when pursuing academic training in Europe.

4 _ ATTENDANCE POLICY

In order to maintain a dynamic and effective learning environment, it is essential students attend all scheduled classes, both held in person or online. Although attendance is not mandatory for all classes, students are allowed up to three absences over the course of the programme.

Absences must be justified, whether due to work activities or medical reasons. Attendance is highly recommended.

TEACHING MATERIALS

Students will receive an online documentation pack comprising an outline of their course and relevant regulations, case law and academic literature for each module. Students may be given reading assignments. Students will have access to an online teaching platform where they can upload the exam and consult the materials before and during each course. All the courses will be filmed (video recording available for each session) and uploaded on the student platform.

BLOCK1 AI FUNDAMENTALS | 12 HOURS (2 ECTS)

1_ FIRST DIVE IN LAW & AI

29.11.2024

 PROFESSORS

ASHWIN ITTOO
Professor of Information
Systems/Business Analytics
HEC ULiege

GIOVANNI SARTOR
Professor of Legal
Informatics and Legal Theory,
ERC-advanced grant Complaw

14_ AI CONTRACTING

14.03.2025

PROFESSORS

TIM VAN CANNEYT
Partner, technology
Fieldfisher

LOUIS VANDERDONCKT
Associate, technology
Fieldfisher

CONTENT

- This course focusses on the intersection of AI and IT contracting, and provides students with a thorough understanding of the contractual considerations that are at play when developing, procuring, implementing and/or deploying AI systems. The course equips participants with the knowledge and skills required to navigate the legal and practical considerations associated with contracting for AI projects.
- › The nature of AI technology development (characteristics and design methodology of AI technology versus conventional software development)
 - › The complexity of the AI supply chain and foundation models from a contractual point of view
 - › Unfair terms and 'take-it-or-leave-it' terms
 - › Model contractual terms
 - › Practical focus on key contract clauses for AI systems: IP, liability, data protection, governance, etc.

15_ AI APPLICATIONS FOR LAWYERS

21.03.2025

PROFESSORS

ERIK DE HERDT
Manager Legal &
Regulatory Affairs
Eurofiber Belgium

THOMAS AERTGEERTS
Co-Founder and
Legal Engineer
Aeco Legal Tech

CONTENT

- › AI, big data & open data: challenges and opportunities
- › Drivers for increasing success AI
- › Expert Systems & AI applications in LegalTech
- › Machine Learning & Natural Language Processing
- › Ethics of Algorithms
- › Open legal data
- › Open case law
- › Legaltech in practice
- › Digital transformation
- › Tailor-made solutions for your company
- › Customized Business Applications
- › Document Analysis and review
- › Retrieving online information
- › Legal Inference Transformation Engine

16_ CODING FOR LAWYERS

28.03.2025

PROFESSORS

TOON CALDERS
Professor of Computer Science
Universiteit Antwerpen

CONTENT

During the lecture you will learn the basic principles of coding:

- › Sequence of instructions
- › Loops and repetitions
- › Conditional execution
- › Variables

You will learn these constructions while step by step implementing an algorithm to escape from any maze.

- › Exercises on writing small programs.
- › Functions as a tool for abstraction
- › Manually build a classification system

The lecture will be wrapped up by connecting the new insights you gained into programming and with AI applications such as text classification.

LIVE STREAM CLASSES

CLASSES WILL BE BROADCAST LIVE. IN THE EVENT THAT TEACHERS ARE UNABLE TO HOST CLASSES ON-SITE DUE TO UNFORESEEN CIRCUMSTANCES, THE SESSIONS WILL BE CONDUCTED ONLINE. PARTICIPANTS WILL BE NOTIFIED OF ANY CHANGES PROMPTLY.

BLOCK3 AI IN PRACTICE | 21 HOURS (3 ECTS)

17_ BLOCKCHAIN AND DIGITAL CURRENCIES

11.04.2025

 PROFESSORS

DEVEN DOBBELAERE
IP/IT/Data Protection & Privacy Lawyer
CMS

FLORENT DUBOIS
Managing Director
Cryptodevise

 CONTENT

PART 1

- › Blockchain History
- › What's a Blockchain?
- › Where does it come from?
- › How does a Blockchain work?
- › Blockchain transaction
- › Blockchain Principles
- › Blockchain Concepts
- › Paying with cryptocurrencies
- › Using Bitcoin
- › Hard wallet
- › Blockchain projects

PART 2

- › Exploring some blockchain concepts
 - Crypto-assets: NFTs
 - Smart Contracts
- › Blockchain and law
 - NFTs and legal implications
 - Liability
 - Blockchain and Data Protection
- › Blockchain regulation

18_ SMART CONTRACTS

18.04.2025

 PROFESSORS

DEVEN DOBBELAERE
IP/IT/Data Protection & Privacy Lawyer
CMS

FLORENT DUBOIS
Managing Director
Cryptodevise

 CONTENT

- › Building our own cryptocurrency with a smart contract
- › Ethereum platform and smart contracts
- › Introduction on Smart Contracts
- › What are Smart Contracts?
- › Pros and Cons
- › Smart Contracts in different domains
- › Legal Smart Contracts
- › The Future

19_ ECONOMIC REGULATION AND COMPETITION POLICY IN THE METAVERSE

25.04.2025

 PROFESSORS

NICOLAS PETIT
Head of Department
European University
Institute

YELIZ DOKER
PhD Researcher
European University
Institute

CYRIL FISCHER
Digital Law and
Data Protection Lawyer
Stibbe

FRANCISCO DE ABREU DUARTE
PhD Researcher

06.06.2025

PROFESSORS

JELLE HOEDEMAEKERS
Expert in Regulation and
Standardization Agoria

CONTENT

This comprehensive course is designed to provide you with a solid understanding of the crucial role that standardisation plays in the AI landscape.

During this course we will address these topics:

- › General introduction to Standardisation
 - Origins
 - Standards development organisations
 - Processes
 - Participation modes
- › Standardisation of AI
 - International
 - European
- › Standardisation policy & strategy
 - The new legislative framework
 - EU standardisation strategy
- › The link between the AI Act and Standardisation
 - Standardisation request
- › Interactive exercises

WHAT THEY SAY ABOUT US ?

This program addresses all essential legal and ethical aspects of AI but goes even beyond these aspects and provides a great range of diverse perspectives from the mere technical to the high level political and economical developments of AI. The program encourages you to think in an innovative, diverse and critical manner to how our future should look like [...]. I would definitely recommend this program to all lawyers eager to remain up to date in terms of what our future world might look!

LAURENCE EISWEILER - Legal Director at Pfizer

The diversity of the teaching profiles is a real asset of this program (lawyers, engineers, academics, people from the industry...) [...] The BSC offers a program adapted to those who work with an exam formula that encourages deepening of the subject and critical thinking. I have enjoyed taking this program and I highly recommend it.

LAURENCE VAN MEERHAEGHE - Legal Counsel at Febelfin

Participating in this program is challenging, but the reward is even greater. This is aimed at professionals who are not technicians, but need to understand in a transversal manner the ethical and legal implications of the use of AI in our society and in their respective industries [-]The quality of the lecturers is very high, all having a highly specialized academic and professional level in the subject I can only strongly recommend!

SOPHYAN BELATARIS - Compliance Manager & AMLCO at Bancontact Payconiq

The Executive Master in Law & AI encompasses an interdisciplinary curriculum that explores the intersection of law, ethics, and AI. It combines both essential aspects of the legal and ethical AI spectrum and more sophisticated perspectives of the technical and economic developments in AI [...] AI enthusiasts or lawyers eager to expand further their knowledge and remain current in this field should definitely participate in this program.

ANGELIKI TILIGADI - Member of Support Pool of Experts at the European Data Protection Board

The Executive Master in AI and Law is an excellent programme that allows you to fast-track your understanding of AI, improve your advising skills in the area of AI and identify opportunities to incorporate AI-enabled solutions in your profession. The programme journey offers a broad curriculum that builds a bridge between the technical, legal & ethical aspects and different sectoral applications, creating learning opportunities for participants from different professional backgrounds. The combination of academic professors and experienced executives allows you to learn from the best in the field, in the class room setting or the comfort of your (home) office."

CHANTAL VETS - Deputy Chief Privacy Officer at Medtronic
