

EXECUTIVE MASTER IN LAW & AI

ACADEMIC YEAR 2026 - 2027

BSC Brussels Study Center
LAW & POLICY

LIÈGE université

EXECUTIVE PROGRAMME IN LAW & AI

20 CREDITS

Launched in 2017, this advanced educational programme explores the legal and policy challenges raised by artificial intelligence (AI) and emerging digital technologies. The programme is entirely taught in English and structured into four thematic blocks comprising a total of 25 modules. Upon successful completion of all modules, students are awarded an Executive Master diploma issued by the University of Liège, corresponding to 20 ECTS credits.

BLOCK 1
AI FUNDAMENTALS

1 **INITIATION TO ALGORITHM DESIGN** 8
16/10/2026 | R. SIEBERATH

2 **FIRST DIVE IN LAW & AI** 8
22/10/2026 | A. ITTOO, G. SARTOR

3 **ETHICS AND AI** 9
30/10/2026 | L. GROZDANOVSKI, M. C. CHAMMAS

4 **PUBLIC POLICY AND AI REGULATION AROUND THE WORLD** 9
13/11/2026 | L. RUSSO, A. MAUGERI, Z. LI

BLOCK 2
THE LAW OF AI

5 **EU REGULATION: THE AI ACT** 10
20/11/2026 | M. ALMADA, T. STROBAND

6 **LIABILITY** 10
27/11/2026 | A. BERTOLINI, J. DE BRUYNE, O.ENNAJI, M-C NAJJAR

7 **DATA PROTECTION** 11
02/12/2026 | L. DE MUYTER, A. COLAPS

8 **AI & LAW ENFORCEMENT** 11
11/12/2026 | V. FRANSSEN, F. JACQUES

9 **COMPETITION AND CONSUMER PROTECTION** 12
18/12/2026 | F. BOSTOEN, T. GRAF, P. PAŁKA

23 **INSURANCE AND AI** 19
09/04/2027 | A. TILIGADI

24 **STANDARDIZATION AND AI** 20
16/04/2027 | J. HOEDEMAEKERS

25 **LEGAL SERVICES** 20
23/04/2027 | M. EVRARD, J. DUTORDOIR, A. DYEVRE, J. DE COOMAN

Foreword

The Brussels Study Center is delighted to introduce the Executive Master in Law & Artificial Intelligence — a programme designed to equip legal professionals, policy-makers, and industry leaders with the knowledge and tools needed to engage critically with one of the most transformative technologies of our time.

Artificial intelligence is reshaping not only markets and business models, but also the foundations of law, ethics, and public governance. This Executive Master offers a unique space where legal reasoning meets technological understanding, where theory is confronted with real-world challenges, and where regulation evolves in step with innovation.

Beyond providing participants with up-to-date knowledge on legal frameworks, AI systems, and the ethical dimensions of digital transformation, this programme is also a platform for dialogue and exchange. We strongly believe that professional growth goes hand in hand with human connection. That is why we have designed this programme to foster genuine relationships — between participants, with faculty, and with the broader network of experts and institutions engaged in the field.

Whether over in-depth seminars, collaborative projects, or informal discussions, participants are encouraged to share experiences, challenge assumptions, and build lasting bonds that extend far beyond the classroom.

We hope that this Executive Master will not only expand your intellectual horizons, but also inspire new friendships, new collaborations, and new ideas.

PHILIPPE LAMBRECHT

- President of the BSC
- Special Advisor to the CEO of the FEB

CHARLES GHEUR

- Co-Founder and Co-Director of the BSC
- Advisor to the Minister of Economy, Industry, Digital Affairs

NICOLAS PETIT

- Co-Founder and Co-Director of the BSC
- Professor at the EUI

AMBITION OF THE PROGRAMME

LEGAL, POLITICAL AND ETHICAL CHALLENGES

The 'digitalization' of our lives poses a real challenge for the law, given that the rules currently in force may turn out to be unsuitable or insufficient to cope with this new reality.

This could have an impact on all aspects of the law, including liability law (civil/criminal, contractual/non-contractual), intellectual property, trade secrets, competition, consumer protection, privacy protection, insurance law and judicial law. Sooner or later, the changes brought about by AI will affect every single area.

The aim of this programme is to help legal advisers and public policymakers better understand these changes, anticipate them and guide them where appropriate.

MULTIDISCIPLINARY TRAINING (BOTH LEGAL AND TECHNICAL)

To grasp AI's impact on our society, it is worth learning about the technical aspects as well: understanding how an algorithm works, getting to grips with IT jargon, understanding what is meant by 'deep learning', 'neural network', and so on. This is also about teaching legal advisers about technology. Legal advisers and policymakers need to have a working understanding of technological concepts in order to provide better counsel to their clients, companies or public authorities.

With this in mind, the courses are run by both legal advisers and technical experts. The technical experts use concrete, understandable language to shed light on changes in our society and the huge potential of AI and cognitive technologies.

Special emphasis is placed on sectors where AI is growing the most at the moment: mobility, finance, healthcare and legal services.

ADMISSION REQUIREMENTS

EDUCATION

All applicants must hold a first cycle of higher education diploma in Law, Economics or Management Science. Alternatively, applicants may have completed two years of higher education with 3 years of relevant professional experience in a field related to law and digital technology.

LANGUAGE SKILLS

A working knowledge of English is required (Council of Europe, Independent User, scale B2).

VISA REQUIREMENTS

Participants must hold a valid visa when they attend the programme at the Brussels Study Center.

Non-EU foreign students may have to provide a copy of their visa during the application process. Relevant information may be found on the website of the Ministry for Foreign Affairs.

http://diplomatie.belgium.be/en/services/travel_to_belgium/studying_in_belgium

No visa is required for distance learning classes.

FEES

The tuition fee is **€4.000** * for the entire course **(25 modules)**.

The fee for a separate module is €300.

Students interested in spreading their attendance over 2 years should mention it at the beginning of the application process. The Board may then allow the programme to be spread over **a maximum of two years**. Students who want to spread the programme over **two years** will be requested to pay a **€500** fee per additional year. This fee covers administrative costs.

The course fees are due before registration deadlines.

REGISTRATION

Executive Master applicants must submit their application no later than **16 October 2026**. The registration form can be filled directly from the Brussels Study Center website:

As a rule, tuition fees must be paid in full prior to the start of the programme or chosen block/module. Upon receipt of payment, the student's BSC account will be activated and registrationwill be complete.

The programme is geared towards the requirements of working professionals. Participants may decide to follow only part of the programme, opting for a limited range of modules which correspond to their main areas of interest. **Students attending the programme, or part of it, are entitled to continuing professional development (CPD) points from the relevant authorities.**

** Fees include the programme modules, catering and course materials only.*

ORGANISATION

TIMETABLE

The Executive Master in Law & AI covers a full academic year, starting on 16 October 2026 and ending on 23 April 2027. The courses are organised on Friday mornings via Zoom or at the premises of the Sparks Meeting Brussels. The Executive Master is divided into four blocks of 25 modules. Each module takes place on Friday mornings **from 9.00 a.m. to 12.30 p.m.** (Brussels Time).

DISTANCE LEARNING CLASSES

All classes can be taken remotely:

Either the classes are given completely remotely via the "My BSC" platform

Or they are given in a hybrid format, i.e. in person to students while being simultaneously livestreamed.

ASSESSMENT

To earn the Executive Master in Law and AI diploma, students must:

1 _ EVALUATION OF BLOCKS 1, 2 AND 3

At the end of each block (except block 4), students will receive via the "My BSC" learning platform an individual take-home exam to be returned two weeks later (e.g. case studies, multiple choice questions, etc.).

2 _ END-OF-YEAR WORK

During the year, the student will identify a subject of his/her choice related to AI law. The final project can take one of the following two forms.

If the subject is more theoretical, the student can write a **dissertation** (about 20 pages).

or

If the subject is more technical and/or practical, the student can choose to give an **oral presentation** in front of a jury (e.g. business case, AI application to be developed by your organisation, Legal Tech project, etc.)

Important Academic Policy
Failure to submit even one exam by the official deadline will automatically result in the postponement of the dissertation submission and, consequently, the deferral of graduation to the following academic year.

3 _ EXECUTIVE MASTER IN LAW AND AI DIPLOMA

Participants who complete the full programme and pass the assessment examination will receive an Executive Master in Law & AI delivered by the University of Liège, as well as 20 credits (see European recognition and the decree of 7 November 2013 defining the higher education landscape and the academic organisation of studies). The certificate is personally significant for the participant's training and education plan, and the credits can be used when pursuing academic training in Europe (provided the credits are accepted by the programme for which the participant would subsequently like to enrol).

4_ ATTENDANCE POLICY

To ensure academic success and maintain the quality of the programme, students are strongly encouraged to participate in all scheduled classes, whether in person or online. Regular participation is essential, as each module concludes with an examination and the programme also requires the submission of a written dissertation. Consistent attendance and engagement provide the knowledge and preparation necessary to meet these academic requirements successfully.

TEACHING MATERIALS

Students will receive an online documentation pack comprising an outline of their course and relevant regulations, case law and academic literature for each module. Students may be given reading assignments. Students will have access to an online teaching platform where they can upload the exam and consult the materials before and during each course. All the courses will be filmed (video recording available for each session) and uploaded on the student platform.

BLOCK 1 : **AI FUNDAMENTALS** 14 Hours

1 INITIATION TO ALGORITHM DESIGN

16/10/2026

PROFESSORS

ROALD SIEBERATH
Director at AI Black Belt

CONTENT

PART 1: AI CONCEPTS

- What is AI? Examples of AI
- Why is AI important? (+Ethics & legal implications)
- How does it work?
- Machine Learning
- "Data Culture"
- A feeling of possibility

PART 2: AI PROJECTS

- What to do? Detecting opportunities
- How to choose an AI project
- Workflow of an AI project
- Case

2 FIRST DIVE IN LAW & AI

22/10/2026

PROFESSORS

ASHWIN ITTOO
Professor of Information Systems/Business Analytics at the University of Liège

GIOVANNI SARTOR
Professor at the European University Institute

CONTENT

- How to characterize AI: Edge between Science and engineering of making machines
- What is Machine intelligence via learning?
- What is Supervised Learning
- How does Artificial Neural Networks work
- How do you process Deep Learning?
- What are the different uses with Big Data?
- Do you know Natural Language Processing (NLP)?
- Antitrust Cases in AI Science
- The role of Unsupervised Learning in Antitrust Cases
- What are the regulatory issues for cognitive technology and AI?
- General legal options in relation to AI
- AI technology introduction in the Public Sector
- What is good Public Administration
- How does AI intervene

3 ETHICS AND AI

30/10/2026

PROFESSORS

LJUPJO GROZDANOVSKI
Research Associate at the FNRS

MONA CAROLINE CHAMMAS
Founder, Government & Business Counsel at Govern & Law

CONTENT

- AI Ethics: an Introduction
- Ethics 101: Why are we talking about Ethics?
- Main ethical theories
- Ethical relativism?
- Ethics of AI
- Disambiguation: Ethics of AI / Machine Ethics
- Ethics and the Law
- Challenges to govern "AI"
- From Ethics to Policy and Law
- An STS approach to AI Ethics
- AI Ethics put to Practice: Policy, Law & Use-cases
- The EU Approach to Ethical AI
- Ethics Guidelines for Trustworthy AI
- Beyond the EU border
- Use Cases

4 PUBLIC POLICY AND AI REGULATION AROUND THE WORLD

13/11/2026

PROFESSORS

LUCIA RUSSO
Economist and Policy Analyst in AI at OECD

ALEXANDER V. MAUGERI
Of Counsel at JONES DAY

ZHUYI LI
Associate Professor at Durham University

CONTENT

- Regulatory Framework for AI
- What/When/How to regulate ?
- Regulation by whom ?
- The state of Global AI Regulation
- Reliance on existing law vs new legislation
- Utilising existing regulatory body vs AI regulatory body
- EU : the world's first comprehensive AI law ?
- US : Blueprint for an AI Bill of Rights
- NIST's AI Risk Management Framework
- China : Next Generation AI Development Plan /
- Algorithm Provisions / Deep Synthesis Provisions
- The OECD AI Principles

BLOCK 2 : THE LAW OF AI 28 Hours

5 EU REGULATION : THE AI ACT

20/11/2026

PROFESSORS

TJADE STROBAND
Director AI and Information Integrity Policy, EU Government Affairs at Microsoft

MARCO ALMADA
Postdoctoral Researcher at University of Luxembourg

CONTENT

- Definitions and technological scope of the regulation
- AI techniques and approaches covered
- Risk-based approach
- New transparency obligations
- Voluntary Codes of Conduct
- Protection of fundamental rights
- Notifying authorities and notified bodies
- CE marking and process
- Data quality and integrity
- Data governance
- Record-keeping
- Human oversight
- Accuracy, robustness andcybersecurity
- Obligations of operators
- Penalties
- Supporting innovation : regulatory sandboxes, support for SME's/start-ups
- The governance structure

6 LIABILITY

27/11/2026

PROFESSORS

ANDREA BERTOLINI
Professor of Law at Scuola Superiore Sant 'Anna

JAN DE BRUYNE
Assistant Professor IT Law in the Centre for IT& IP Law at KULeuven

OMAR ENNAJI
Legal & Policy Officer at the European Commission

MARIE-CLAIRE NAJJAR
Researcher at European University Institute

CONTENT

PART 1: AI AND LIABILITY

- Definitions matter, Autonomy & Electronic personhood
- EU Directive on liability for defective products
- A law and economic analysis of product liability
- Alternatives: Risk-Management
- Separating the functions of liability rules
- The October 2020 proposal of the EU Parliament
- Case studies

PART 2: LIABILITY DIRECTIVE

- EU safety and liability frameworks
- Principles of the EU safety and liability frameworks
- Main concepts of the directive
- Recent findings

7 DATA PROTECTION

02/12/2026

PROFESSORS

LAURENT DE MUYTER
Antitrust, Telecom and Data Protection Partner at JONES DAY

ANNA COLAPS
DSA Officer for Italy at the European Commission

CONTENT

- Introduction: context of personal data regulation and privacy and its relationship with AI
- Evolving data protection reform causes and correlations
- Data and AI – soft law, getting harder
- GDPR applies to “processing” of “personal data”
- GDPR
- First cases/decisions

8 AI AND LAW ENFORCEMENT

11/12/2026

PROFESSORS

VANESSA FRANSSEN
Professor at ULiège & Affiliated Senior Researcher, Institute of Criminal Law at KULeuven

FLORIAN JACQUES
Researcher in ICT Law at UNamur

CONTENT

- Introduction: AI Compliance Tools and Applications
- Detection tools
- Prediction tools for facts
- Prediction tools for legal outcomes
- Automated adjudication tools
- Execution tools
- Conclusions
- References

BLOCK 2 : THE LAW OF AI 28 hours

9 COMPETITION AND CONSUMER PROTECTION

18/12/2026

PROFESSORS

FRISO BOSTOEN
Assistant Professor of Competition Law & Digital Regulation at Tilburg University

PRZEMYSŁAW PAŁKA
Assistant Professor Jagiellonian University

THOMAS GRAF
Partner at Cleary Gottlieb LLP

CONTENT

- AI and Data related Competition Policy developments in Europe
- Algorithm, Data and Competition Law
- Background
- Competition law issues raised by AI
- Risk of tacit collusion
- Price discrimination
- How competition agencies might be able to use AI as a tool in their work?
- Market based/tech solutions
- Could or should we use AI systems to solve those problems?

10 LABOUR MARKET & LABOUR LAW

08/01/2027

PROFESSORS

MARIE-CLAIRE NAJJAR
Researcher at European University Institute

ANNE JOPPE
Junior Assistant Professor at Utrecht University

AIDA PONCE DEL CASTILLO
Senior researcher at European Trade Union Institute

CONTENT

- AI in the workplace and in the labour market
- Biometric data processing in the workplace: GDPR in employer-employee relationships
- Automated decision-making in the workplace and in hiring decisions: GDPR and AI Act approaches
- Automated decision-making in the gig economy: specific issues and focus on the Italian DPA's approach
- The need for AI explainability

11 AI & INTELLECTUAL PROPERTY

15/01/2027

PROFESSORS

JULIEN CABAY
Associate Professor ULB and ULiège

PAULIEN WYMEERSCH
PhD Fellow at Ghent University

CONTENT

- What is IP right?
- Trademarks
- Patents
- Copyrights
- Design rights
- What is AI?
- Relevant concepts
- Are AI creations protectable by IPRS?
- Copyrights
- AI generated works
- Authorship
- Patents
- Patentability AI
- AI Co-inventorship
- Ethics and AI
- To a new patent system
- Processing, Mining (and Producing) Data in the EU: A Copyright Perspective
- Data & Copyright
- Data Processing
- Data Mining
- Data Production

12 CYBERSECURITY

22/01/2027

PROFESSORS

BART ASNOT
CSA Manager Security at Microsoft

PEDRO DEMOLDER
Senior Associate at Timelex

RAFAEL GALVEZ
Postdoctoral Researcher at COSIC (KULeuven)

CONTENT

- What is Cybersecurity?
- AI & Cybersecurity: legal perspective
- Case Study
- Legal perspective
- Legal impact of AI
- AI as issue for GDPR compliance
- AI in investigation and prosecution
- AI in court: mind the gap
- AI within Security
- and Microsoft's
- approach to security
- Security built on
- intelligence
- Technical perspective
- of Cybersecurity
- Security & Privacy by Design
- Cybersecurity & AI
- AI as a tool to defend
- AI as a vulnerable object
- Encryption: hiding
- training data
- Model integrity
- Entity authentication
- Phishing
- Security is necessary
- for privacy
- What is privacy for whom?
- The theory of Contextual Integrity
- Privacy & AI
- Federated learning

BLOCK 3 : AI IN PRACTICE 25.5 hours

13 CODING FOR LAWYERS

29/01/2027 (ONLINE)

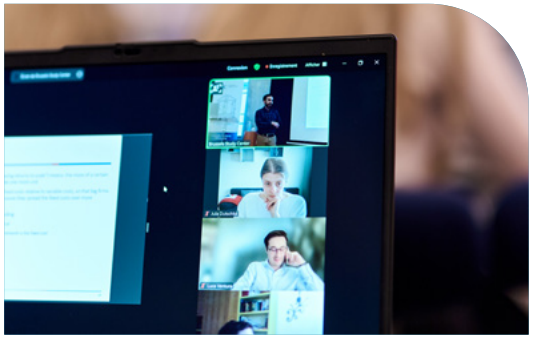

PROFESSORS

TOON CALDERS
Professor at Universiteit Antwerpen, Department of Computer Science

CONTENT

- During the lecture you will learn the basic principles of coding:
  - a. Sequence of instructions
  - b. Loops and repetitions
  - c. Conditional execution
  - d. Variables
- You will learn these constructions while step by step implementing an algorithm to escape from any maze.
  - a. Exercises on writing small programs.
  - b. Functions as a tool for abstraction
  - c. Manually build a classification system
- The lecture will be wrapped up by connecting the new insights you gained into programming and with AI applications such as text classification.

14 AI CONTRACTING

05/02/2027

PROFESSORS

TIM VAN CANNEYT
Partner, technology at Fieldfisher

INES BENAZZOUZ
Lawyer at Fieldfischer

CONTENT

This course focusses on the intersection of AI and IT contracting and provides students with a thorough understanding of the contractual considerations that are at play when developing, procuring, implementing and/or deploying AI systems. The course equips participants with the knowledge and skills required to navigate the legal and practical considerations associated with contracting for AI projects.

- The nature of AI technology development (characteristics and design methodology of AI technology versus conventional software development)
- The complexity of the AI supply chain and foundation models from a contractual point of view
- Unfair terms and 'take-it-or-leave-it' terms
- Model contractual terms
- Practical focus on key contract clauses for AI systems: IP, liability, data protection, governance, etc.

15 AI GOVERNANCE

12/02/2027

PROFESSORS

LOUIS VANDERDONCKT
Senior AI Consultant / DPO at ML6

FRANCESCO CILURZO
AI Strategy & Governance Advisor at ML6

CONTENT

What is AI Governance, and why is it important?

- Departing from the HLEG Guidelines on trustworthy AI, the session will elaborate on the role of trustworthy AI under the AI Act, and how to apply this in practice using the Assessment List for Trustworthy AI (ALTAI).
  - The session will look into the potential risks surrounding AI development, adoption, and deployment.
  - The session will also address and compare other AI risk assessments on the market to help participants understand how to choose and tailor AI risk assessments to their needs.
- Stressing the importance of building a culture of trust for successful AI transformations.
  - The session will help participants understand the importance of identifying and managing risks early, and being transparent about fairness, responsibility, and security, and how this can help win over even the most skeptical stakeholders.

How to set up an effective AI Governance programme

- The session will look into the four pillars of an effective AI Governance programme
  - Risk management: How to identify and manage AI related risks
  - Accountability: Without clear ownership, no one will take responsibility for identifying and mitigating AI risks. It's also important to have strong support and involvement from management to make sure AI Governance is implemented effectively.
  - Training: addressing the human element of AI governance – developing an AI literacy programme
  - Policies: what type of policies should be considered?

16 AI APPLICATIONS FOR LAWYERS

19/02/2027

PROFESSORS

ERIK DE HERDT
Manager Legal & Regulatory Affairs at Eurofiber Belgium

PASCALINE DERU
Digital Product Manager at Larcier-Intersentia

LENNERT HOOGVLIET
Executive Vice President Sales EMEA at Reveal

NICO DEL RIO
Co-Founder at Knowlex

CONTENT

- AI, big data & open data: challenges and opportunities
- Drivers for increasing success AI
- Expert Systems & AI applications in LegalTech
- Machine Learning & Natural Language Processing
- Ethics of Algorithms
- Open legal data
- Open case law
- Legaltech in practice
- Digital transformation
- Tailor-made solutions for your company
- Customized Business Applications
- Document Analysis and review
- Retrieving online information
- Legal Inference Transformation Engine

BLOCK 3 : **AI IN PRACTICE** 25.5 hours

17 BLOCKCHAIN (AND DIGITAL CURRENCIES)

26/02/2027

PROFESSORS

DEVEN DOBBELAERE
Senior Associate at CMS Belgium

FLORENT DUBOIS
Project Manager at the European Commission

CONTENT

PART 1

- Blockchain History
- What's a Blockchain?
- Where does it comes from?
- How does a Blockchain works ?
- Blockchain transaction
- Blockchain Principles
- Blockchain Concepts
- Paying with cryptocurrencies
- Using Bitcoin
- Hard wallet
- Blockchain projects

PART 2

- Exploring some blockchain concepts
  - Crypto-assets: NFTs
  - Smart Contracts
- Blockchain and law
  - NFTs and legal implications
  - Liability
  - Blockchain and Data Protection
- Blockchain regulation

18 SMART CONTRACTS

05/03/2027

PROFESSORS

DEVEN DOBBELAERE
Senior Associate at CMS Belgium

FLORENT DUBOIS
Project Manager at the European Commission

CONTENT

- Building our own cryptocurrency with a smart contract
- Ethereum platform and smarts contracts
- Introduction on Smart Contracts
- What are Smart Contracts?
- Pros and Cons
- Smart Contracts in different domains
- Legal Smart Contracts
- The Future

19 METAVERSE : TECHNOLOGY, POLICY AND REGULATION

12/03/2027

PROFESSORS

YELIZ DOKER
Resident Lecturer at the European Law and Governance School

CYRIL FISCHER
Senior Associate Lawyer at Stibbe

FRANCISCO DE ABREU DUARTE
CEO at Lexstream

GIOVANNI SORRENTINO
PhD Researcher at Bologna University

CONTENT

- History of the Metaverse
- Key technologies and concepts
- Interoperability issues in the Metaverse
- Web3 and its competitive dynamics
- Metaverse Competition Agency
- Legal Framework around healthcare, virtual identity
- Societal Stakes (online harassment, radicalization, environmental transition…)

BLOCK 4 : VERTICAL APPROACH : INDUSTRY, SECTORS, AND PROFESSIONS

21 Hours

20 MOBILITY AND AI

19/03/2027

PROFESSORS

NADINE ZURKINDEN

Assistant Professor in Criminal Law at University of Zurich

FLORIAN JACQUES

Researcher in ICT Law at UNamur

CONTENT

- Introduction to Smart Mobility
- Artificial Intelligence in the automotive sector
- Analysing the impact of algorithms in the automotive industry and on insurance company
- EU Regulatory approach to AI: Critical issues for our industry
  - Commission's White Paper on AI
  - European Parliament Draft Reports on AI related aspects
- Conclusion

21 HEALTHCARE & LIFE SCIENCES

26/03/2027

PROFESSORS

ROMAIN ALDERWEIRELDT

Senior Associate at CMS Belgium

GIOVANNI BRIGANTI

Head of the Department of Computational Medicine and Neuropsychiatry at University of Mons

THIBAULT HELLEPUTTE

CEO of DNAnalytics

CONTENT

- AI in Healthcare : principles, applications (augmented medicine), challenges and future directions
- Identifying health issues through the analysis of digital data
- Analysing medical images
- Analysing genomics in the context of the advent of personalized medicine
- Ethics in data
- AI use cases in healthcare

22 FINANCE AND AI

02/04/2027

PROFESSORS

MAGALI FEYS
IP, IT and Data Protection Lawyer at AContrario.Law

ALEXANDER FRIMOUT
Lead AI Innovation at ACA Group

LAURENCE VAN MEERAEGHE
Legal Counsel at Febelin

CONTENT

- General introduction: AI as a Technology
- Machine Learning Landscape
- What has changed?
- Three types of Machine Learning
- General Legal & Ethical principles & considerations
- Trustworthy AI
- AI Adoption in Finance: Where are we today?
- Use Cases:
- AI Powered Predictive Analytics
- Hyper-personalization
- Intelligent Process Optimizations (Back-Office)
- How and where should FSI's start? Tips, Tricks and advice on how to start with AI
- Conclusion
- Q&A

23 INSURANCE AND AI

09/04/2027

PROFESSORS

ANGELIKI TILIGADI
Head of Privacy and AI Governance Officer at Qover

CONTENT

- Credit Scoring & Insurance:
  - Introduction: How Does the EU Act apply to regulated industries, such as financial and insurance sector?
  - Brief analysis of Annex III High risk AI systems (focus on paragraph 5)
  - Analysis of Annex III: AI Systems for credit scoring and examples
  - Analysis of Annex III: AI Systems for risk assessment and pricing in life and health insurance and examples
  - Exemptions of Annex III: non-life insurance, financial fraud detection, chatbots
  - Article 6 of the AI Act: Annex III AI systems and profiling profiling in financial and insurance sector
- AI Adoption in financial and insurance sector: Where are we today?
  - Use cases for credit scoring
  - Use cases for insurance (such as telematics)
- Key elements of an internal AI Governance Framework
- Conclusion
- Q&A

BLOCK 4 : VERTICAL APPROACH : INDUSTRY, SECTORS, AND PROFESSIONS

21 Hours

24 STANDARDIZATION AND AI

16/04/2027

PROFESSORS

JELLE HOEDEMAEKERS
Expert in Regulation and Standardization at Agoria

CONTENT

- General introduction to Standardisation
  - Origins
  - Standards development organisations
  - Processes
  - Participation modes
- Standardisation of AI
  - International
  - European
- Standardisation policy & strategy
  - The new legislative framework
  - EU standardisation strategy
- The link between the AI Act and Standardisation
  - Standardisation request
- Interactive exercises

25 LEGAL SERVICES

23/04/2027

PROFESSORS

JULIE DUTORDOIR
Director General at IBJ

ARTHUR DYEVRE
Professor at KULeuven

MAXIME EVRARD
Assistant in administrative law at University of Hasselt

JÉRÔME DE COOMAN
Research Professor at University of Liege

CONTENT

- AI modernising the legal profession
- Crucial challenges for legal services and Legal professions
- The need for a strategic vision of lawyering
- Lawyers need Strategic Analysis
- AI and (more globally) Tech as a challenge and
- a solution for lawyers
- How does Tech change lawyers' tasks?
- Changing the way lawyers work
- Legal Talent Management
- The European context of LegalTech
- Pseudonymisation, anonymisation and differential privacy
- Online publication of machine-readable court records: a milestone in the transformation of the law
- AI and negotiation/mediation
- AI and arbitration
- AI through the eyes of a company lawyer

WHAT THEY SAY ABOUT US ?

« I recently completed the final module of the executive Master in AI at the Brussels Study Center, and I was truly impressed by the quality of the lectures. The program offered a hands-on, immersive experience, diving deep into industries where AI is making a transformative impact.

One of the highlights for me was the course on Mobility, which explored the challenges of autonomous vehicles and the emerging legal questions around liability. It was fascinating to see how AI is reshaping not just technology, but also the ethical and regulatory landscapes of critical sectors. »

ELISABETH PUISTIENNE – LAWYER AND PARTNER AT LIBERIUS

"What really stood out to me about the BSC's Executive Master in Law & AI programme was the calibre and mix of the faculty — not just top academics from leading European universities, but also practicing lawyers and policy officials from the European Commission. They shared valuable insights into how AI regulation is being interpreted and how it's evolving in real time. The programme does a great job of connecting the legal, ethical, technical, and even philosophical sides of AI, giving you a well-rounded and practical view of where things are headed. I'd definitely recommend it to practitioners who are thinking about pivoting into AI law or just want to build a solid understanding of how the EU is approaching this fast-moving space."

VARUN MAHESHWARI, DIRECTOR - DATA PRIVACY & PROTECTION (APAC) AT MEDTRONIC

"The Executive Master in Law and AI at BSC has been a very valuable experience. As an in-house legal counsel in the transportation and logistics industry, I found the program particularly relevant, especially as AI becomes increasingly central to operational efficiency, regulatory compliance, and strategic decision-making. The program is both challenging and demanding, designed for professionals balancing full-time roles with study. It offers a well-rounded blend of legal, technical, and ethical perspectives, and has helped me identify and assess opportunities to deploy AI-powered tools in-house. With lectures delivered by high-caliber professors and industry experts—and the flexibility to join in person or remotely—the program fosters meaningful interaction among a diverse group of participants, both legal and non-legal."

QUINTEN COPPENS,
SENIOR LEGAL COUNSEL
GLOBAL CROSS-BORDER &
INTERNATIONAL 3PL EUROPE AT
BPOSTGROUP

"The Executive Master in Law and AI stands out with its innovative approach by exploring the broad impact of AI across numerous legal fields and delving into its implications thoroughly. The course features a diverse group of lecturers who offer valuable insights into real-world AI applications and the regulatory challenges they encounter. As AI increasingly influences numerous areas of law, this program is exceptionally relevant. It prepares lawyers to navigate the current legal environment and equips them to anticipate future developments in AI regulations. As such, it is an essential program for anyone interested in this rapidly evolving field."
